

PROJECT OVERVIEW:

The Harvest Worship and Event Center will be an approximately 17,000 square foot multipurpose meeting space in Hesston, Kansas. This facility will serve as the home meeting space for Harvest Church, a nondenominational expression of Christ's Church. We will have Sunday services, Bible studies, special events, and all the other "church things" one might expect.

However, our somewhat unique approach to establishing a physical home for our church is to purpose the building toward broader use in the community, as well. We would like to see groups outside of our congregation use the facility for a variety of activities, such as large-scale events like weddings and banquets, to smaller events, like parties and practical classes to help people live better everyday lives (e.g., cooking and other life skills classes).

The building design and concept of the Worship and Event Center is meant to be functional and simple, yet still beautiful as it represents the church's investment in the local community. We don't need to build a cathedral, but we also don't want to build a warehouse. The balance is important. We don't want to waste money that could be better used in our community, and we don't want to raise a structure that blights our community.

We are committed to moving intentionally through this process, establishing milestones (e.g., architect approval, city approval, structural purchase, etc.), and - most importantly - doing our best to follow the Lord's guidance as we proceed
